The 4th June 1951]

NATIONAL SAVINGS

CERTIFICATES

Are now available in three different series, maturing after 5, 7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100, 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 (or thereon inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Commissioners of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simla.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 12th May 1951.

† Figures not available.

Explanation of symbols used :—B.—Births; B.R.—Birth rate; C.—Cholera; S.—Smallpox; P.—Plague; F.—Fever; D.D.—Dysentery and Diarrhoea; R.I.—Respiratory diseases; M.L.—Maternal deaths; D.R.—Death rate; I.D.—Infantile deaths (included in total deaths).

REMARKS

The figures of births and deaths shown in this statement for week ending the 12th May, 1951, relate to 138 towns with an estimated population of 21,260 thousands.

The total number of towns is 234 and their population is 29,017 thousands. Thus 59% of the total number of towns representing 73% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 10,014 and 6,840 representing birth and death rates of 24·5 and 16·7 per thousand of population respectively.

(A) States (Parts A and C).—The data here relate to 116 towns with an estimated population of 18,392 thousands. Information about Assam, Bihar and Madras could not be included. The total number of towns is 202 and their population is 25,187 thousands. Thus 57% of the total number of towns representing 73% of the total population is covered. The numbers of births and deaths recorded in these towns were 8,813 and 5,978 representing

birth and death rates of 24·9 and 16·9 per thousand of population respectively. The table at the end gives the position of the States.

Pandharpur in Bombay was the only town which had a high death rate of 57·8 per thousand of population and this high death rate was largely due to deaths from fevers and respiratory diseases.

(B) States (Part B).—The data here relate to 22 towns with an estimated population of 2,868 thousands. The total number of towns is 32 and their population is 38,30 thousands. Thus 69% of total number of towns representing 75% of total population is covered. The numbers of births and deaths recorded in these towns were 1,201 and 862 representing birth and death rates of 21·8 and 15·6 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
